6th EURASIAN CONFERENCE ON OPENSEES

24-25 July 2024

Tsinghua University

Beijing | China

OPENSEES

(Open System for Earthquake Engineering Simulation) is an object-oriented, software framework created at the National Science Foundation-sponsored Pacific Earthquake Engineering (PEER) Center. It allows users to create finite element applications for simulating the response of structural and geotechnical systems subjected to earthquakes. OpenSees is now a reference software platform in research and practical engineering applications

WELCOME TO BEIJING

After the successful conferences in Rome 2012, Salerno 2015, Porto 2017, Hong Kong 2019, and Turin 2022, **the 6th Eurasian conference on OpenSees is to be held in Beijing, China, in July 2024.** OSD 2024, an official conference of the Eurasian OpenSees International Association (EOS), aims to provide an international forum where users and developers of OpenSees can exchange and share recent advances and future perspectives. economics, management, education.

CONFERENCE TOPICS

Conference topics will cover research and practical experiences with OpeeSees in the field of structural and geotechnical engineering, development of new elements and materials, development of pre and post processors for OpenSees. Authors can submit abstracts through the conference website.
